Eastern Michaud Flats/Simplot (Pocatello, ID): Next Wednesday EPA will meet with the Fort Hall Business Council and hear their concerns related Simplot's plans to expand their gypsum waste piles at their Pocatello Don Plant. The JR Simplot Don Plant is located adjacent to the Shoshone-Bannock Tribes' Fort Hall reservation boundary. The existing unlined gypsum stacks have contributed significant contamination to the groundwater in the vicinity of the plant and have also impacted the Portneuf River. The new stack will be fully lined and meet current RCRA standards.
